

Corporate Portfolio | Serez Cosmetics Inc.

A Florida-based company connecting curated fashion, children's collections and creative ventures with potential retail and distribution partners.

Business Identity

Serez Cosmetics Inc. operates as a Florida-based business. Serez Brands is the corporate presentation of its portfolio and projects. This document is intended for business introductions, not as a guarantee of product availability or regulatory approval.

Distinct Brands, Shared Vision

Mitico Mozzo — apparel, beachwear and selected fashion collections. Kidona Kids — imaginative crocheted toys, amigurumi and artistic clay dolls. Serezian Sound Studio — music production, artist development and curated creative experiences. Additional concepts and innovation projects are presented separately.

Fashion & Resort Collections

A visual portfolio of pareos, resortwear, coordinated sets and selected outerwear. Buyers can request category-specific assortments, product details and availability. Some images may represent collection concepts rather than available inventory.

Amigurumi & Clay Dolls

Character-led crochet and artistic doll collections emphasizing design variety and storytelling. Product specifications, age grading, material details, testing and labeling must be verified for each item and intended market. Character likenesses require intellectual-property review before commercial promotion.

Serezian Sound Studio

Music production, artist collaborations, representation discussions and curated private performance concepts. Prospective artists and partners are invited to introduce their work. Venue and service details should be confirmed before any booking or commercial commitment.

Responsible Commercial Communication

We aim to provide accurate descriptions and available supporting documentation. Certificates are assessed by product, manufacturer, date and market. No blanket claims are made about certification, safety approval, major retailer endorsement or guaranteed fulfillment.

Business Partnership Process

1. Introduce your company and purchasing interests.
2. Identify relevant collections and approximate quantities.
3. Review available product specifications, compliance information and commercial terms.
4. Confirm samples, availability, logistics and next steps by mutual agreement.
